

## Oral Care Starts With the First Tooth

Oral healthcare for your baby starts just as he or she begins teething. With our help, your baby will develop a beautiful smile full of healthy teeth.

The American Academy of Pediatric Dentistry recommends that children have their initial visit to the dentist when their first tooth appears or by their first birthday. At Tri City Kids Pediatric Dentistry, we are committed to serving all of our youngest patients, from babies to teens. We are excited to watch them develop beautiful, bright smiles!

At your first visit, we educate you about nutrition, oral home care for your child, and what to expect for your child's smile in the years to come. We provide quality treatment and prevention guidance based on your child's individual needs.

Dr. Elizabeth Picard has extensive training and experience treating children of all ages. She has earned a reputation for her exceptional patient management skills and ability to put her patients at ease, allowing for a positive dental experience for both parent and child.

**Please call 989-892-9888 to make an appointment for your child.**
